## Notes of Sports.

Now that it has been settled who is to run the skating rink work was commenced this week on getting it in shape for the skaters. Mr Eddie Enders, who had charge of it for the past three years, has secured control of it for this season. Skaters will appreciate the new musical program to be given the patrons on two nights of the week. The various hockey teams have about finished their work of reorganizing; and there will be more hockey teams than ever, on the ice this season.

Now that several of the sports clubs have started operations, it seems time that the other winter sports outfit came alive. Mr Hy Trapp, the well known skii man, has been making efforts which up to the present have proven futile, to get the Skookum Skoo-Ski outfit of snow pushers going. We have the snow; we have the hill; and we have the club house! So, why the delay?

## Home Again!

The Metzler tourist party arrived back in Stony on Friday, from their five weeks' excursion to the Eastern States. The trip took them thru St Paul, Chicago, Toronto, Montreal. The members of the party visited old friends in Chicago, on a stopover privilege. They report having been hospitably treated every place they visited. Transportation for the entire trip was arranged by the local agent of the Canadian National Ry.

## Rifle Club Dance, Nov. 15.

The big dancing event of this season takes place tomorrow night, Nov. 15, in Kelly's Hall, as practically all arrangements have been completed for the annual affair of the Stony Plain Rifle Club. The Barby Orchestra has been engaged, and a pleasant time is assured all who attend.

## Funeral of Mrs. Giebelhaus.

The death occurred in Edmonton on Sunday, November 3rd, of Clementina Bertha, beloved wife of Mr Henry Giebelhaus. Deceased had been suffering from an attack of bronchial pneumonia, and had taken to the City for treatment.

The funeral took place Tuesday, Nov. 5th, a service being held in the Reform Church, Glory Hills. Interment was made in the churchyard, Rev C H Reppert, the pastor, officiating.

Deceased had been, at one time, a resident of Stony Plain, having been employed as accountant at the Joe Miller store previous to her marriage.

She is survived by her husband and four children—3 girls and 1 boy.

## Card of Thanks.

Mr Henry Giebelhaus wishes to thank his friends for the kindness shown, and for the expressions of sympathy given, on the occasion of his recent and bereavement.

## Annual Fire Losses

During the next few months while King Winter holds the prairies in his icy grip and folks are piling furthest and furthest high with fuel to withstand his onslaught the newspapers can be depended upon to relate a number of stories of dreadful tragedy.

They will be stories of families or members of families burned to death, the charred remains of their homes their funeral pyres. In some cases a whole family will disappear in the raging inferno that will devour their homes. In other cases, some members of the family will escape in night attire or scanty clothing only to suffer agonies and perhaps death from frostbite as a result of their misadventure.

Adults and children ranging almost from maturity to infants a few months old will be asphyxiated by smoke or burned to a crisp. Others will suffer untold agonies for weeks and perhaps months from burns or frost-bites occasioned by a hurried flight from a burning home in sub-zero weather, or by a combination of both. These will represent a portion of the toll to be exacted against the prairie dweller during the winter of 1935-36 by the Fire Demon, if the history of the past few winters is repeated.

In addition to causing the death of a considerable number and the injury, permanent or temporary of a still greater number, the fire fiend will, during the twelve months of 1936 take a further toll of property to a total value of approximately four and a half millions of dollars in the provinces of Alberta, Saskatchewan and Manitoba, if the fire loss story of the past three years is repeated.

These facts and figures, borne out by official data and records of the fire commissioners of the three provinces indicate that people are paying an appalling tribute to carelessness, or ignorance of the dangers they run when they fail to exercise proper control over one of the most useful elements in the service of man, when kept in its place.

For accompanying the facts and figures in the possession of governmental officials is sufficient evidence to show that carelessness or ignorance must be indicated for this tremendous loss of life and property. The testimony indicates clearly that most of these tragedies are needless. They can be obviated if proper precautions are taken at the right time.

Out of a total of 49 deaths by fire in Alberta and Saskatchewan in the calendar year, 1934, thirteen, or more than one-fourth, were directly attributable to the misuse of gasoline, distillate or coal oil in lighting fires or speeding up slow fires in kitchen ranges, stoves or furnaces. In addition the deaths of a number of other people who were trapped in homes or buildings destroyed by fire where the cause of the outbreak is listed as "unknown" may also have been placed in the same category if the origin of the conflagrations could have been determined.

But that is not the whole case against this trinity of highly inflammable and therefore dangerous liquids. For, in addition to the number cited, five more lost their lives as a result of explosion of gasoline, four on account of explosion of coal oil lamps, two because coal oil stoves exploded and one other died when gasoline used as an agent for cleaning clothes ignited during the process.

While misuse of gasoline and coal oil is the major factor in loss of life by fire in the prairie provinces, defective heating apparatus is responsible for the greatest property loss as well as for some of the deaths and this fact is also clearly brought out in the data contained in the reports of the fire commissioners.

Approximately 3,000 buildings are either a total loss or seriously damaged by fire in the three provinces every year, occasioning a monetary loss of about \$2,250,000 or approximately one half of the total average annual property loss by fire.

Most of this loss naturally occurs between November 1 and March 31, as might be expected, this being the period when furnaces and stoves are being forced to capacity to combat the outside cold.

Unfortunately the origin of two-thirds of the heaviest losses is never determined, but of the remaining one-third more than 50 per cent. is laid to the door of defective chimneys, stoves and stove and furnace pipes and one half of the remainder to carelessness of smokers in disposing of cigar and cigarette butts and pipe ashes or matches.

Experience has shown that the greatest property loss occurs in January during the period of the most severe winter weather and simultaneous with some of the most direful tragedies to prairie residents.

In the light of these facts, it would seem almost unnecessary to issue warnings to people to refrain from using inflammable liquids to hasten fires, to make sure that all heating apparatus is in safe condition to withstand a long siege and to exercise care when smoking. But such warnings are issued frequently by authorities and still the tragedies and losses continue.

## DON'T RISK BAKING FAILURES . . .

"I CAN'T AFFORD TO RISK  
FAILURES DUE TO INFERIOR  
BAKING POWDER. THAT'S  
WHY I INSIST ON MAGIC. IT'S  
ECONOMICAL - LESS THAN 1/4  
WORTH MAKES A BIG CAKE."

says MISS MARGARET McFARLANE, Division of St. Michael's Hospital, Toronto.

Leading Canadian Cookery Experts warn against trusting fine materials to doubtful baking powder. They use and recommend MAGIC Baking Powder for perfect cakes!

CONTAINS NO ALUM-This statement on every tin is your guarantee that Magic Baking Powder is free from alum or any harmful ingredients. Made in Canada

## Marvels Of Surgery

Limbs Of Crippled Children Are Made Straight And Strong  
Detouring of muscles and nerves in surgical remodelling of arms and legs to convert crippled children into straight and strong boys and girls was described to the American College of Surgeons.

The operations were reported by Leroy C. Abbott, M.D., and Frederick C. Bost, M.D., of the University of California medical school.

One was performed on a 13-year-old girl, with a leg deformity due to a brain injury at birth. The leg suffered from permanent spasms, stiffening and deformity, because part of the brain controlling certain leg muscles did not work properly.

The surgeons cut out the nerves leading to the faulty muscles, thereby disconnecting them partly from the hairy control. Then they lengthened the muscles, which had been too short, by a tendon operation.

The result was to relieve the strain which had held the child's leg in the deformed position.

## Westerner Obtains Honor

Vancouver Youth Is First Merchant Service Midshipman Pilot

One of Vancouver's sons has gained the distinction of being the first merchant service midshipman in the British Empire to enroll for aviation and receive a pilot's license.

He is Cadet Captain Walter R. N. Sturdy, who left on his first voyage on the Empress of Japan out of Vancouver for the Orient. He has signed as a cadet with the C.P.R. for three years.

Flying is a new field of endeavor for the merchant service. Cadets receive theoretical studies on board H.M.S. Conway, the training ship at Liverpool, and practical experience at Hooton aerodrome, Liverpool.

Young Sturdy came within 30 minutes of creating a record in training for solo flight. The requirement calls for 12 hours before taking solo, and the record for the British air ministry is five hours. The Vancouver boy made it in 5 hours, 20 minutes.

## Trans-Atlantic Air Service

New Style Of Craft May Make Experimental Flights Next Year

Two airplanes of radically different types are being constructed by Imperial Airways Limited, for trans-Atlantic service, it was disclosed in London.

Sir Eric Geddes, chairman, told the annual meeting of the company one of the craft may be ready for experimental flights next year. He said "I believe not only to our interests but also to those of our cousins, the United States, that Great Britain and the United States should co-operate in the establishment of regular air service from Europe to North America."

## HAVE YOU Digestive Troubles?

Mr. W. J. Fisher, 359 Hunter St., London, Ont., said: "I suffered from cramps of the stomach, could eat but very little and that would cause distress. I grew weaker daily and had headaches almost constantly. I became very much discouraged. After taking Dr. Pierce's Golden Medical Discovery I was able to eat, gain in weight and resumed my work." All druggists.

## Build Military Roads

Super Highways To Be Constructed In Germany

A scheme for a vast network of super-highways in Germany, which foreign experts see as of great military significance, was a step nearer realization recently.

Officials announced work would begin soon on a 10-mile stretch in two Berlin suburbs, forming part of a big circle of the proposed super-highway around Berlin. It will be important in serving southern traffic.

One foreigner observed said: "One lesson that Germany learned in the Great War is the need for perfect communication facilities."

The Modern Oxford Bible is said to be the only book in the world that does not contain a typographical error.

There should be an unlimited supply of gratitude. It is so seldom used.

## Sight Restored

Toronto Woman Recovers Sight As Result Of Earthquake

Sixty-three-year-old Mrs. Kate Mitchell saw clearly for the first time in three years as she turned on the electric lights just after the earthquake shook her King street house in Toronto. The tremor was like a message "direct from heaven" for her, the white-haired woman said, convinced the shock restored her sight.

For three years, Mrs. Mitchell said she had been able "only to see shadows." She could not leave the house without aid of another person.

"Thank God I can now see," she said—"the long hours of night are over."

## FASHION FANCIES

"SELF-HELP" BUTTON-DOWN-FRONT EASY-TO-MAKE DRESS FOR SCHOOLGIRLS

By Ellen Worth  
Don't you think this is a cunning dress for little school-age daughter? It won't catch on her nose or muss her hair up (so it needs more combing) getting it on and off. She doesn't need any aid from mother, either, to slip into it.

One of the new looking wine-red ground cotton prints made the original. The collar and cuffs are white pique.

Another delightful suggestion is wool jersey in pottery rust with white linen collar and cuffs made detachable, so as to be readily removed for laundering.

Style No. 756 is designed for sizes 4, 6, 8 and 10 years. Size 8 requires 2 yards of 30-inch material with 3/4 yard of 36-inch contrasting. Patterns 15c each. Address mail orders to: Pattern Department, Winnipeg Newspaper Union, 175 McDermott Ave. E., Winnipeg.

Let the new Fall and Winter Fashion Magazine assist you in assembling your family's fall clothes. There are designs for every type and every occasion. And of course one of our perfect-fitting patterns is obtainable for every design illustrated. Don't delay! Send for your copy today!

Polly—"Shall I go to a mind-reader or a palm-reader?"  
Paul—"Make it a palm-reader. Undoubtedly you have a palm."

## Olympic Camera Is Fast

Can Show Pictures On Screen Ten Minutes After Race

A motion picture film which can be shown on the screen ten minutes after taking the picture has recently been perfected especially for the Berlin Olympic games in 1936.

This film is used in a camera which makes 100 exposures per second. While the race is being filmed, a clock mechanism, released the moment of its start, records the time on the film every one-hundredth of a second, so that the runner's time as he crosses the finish line is clearly registered on the film.

The officials at the Olympic games at Los Angeles used a similar device, but it took quite some time after the finish of a race before the film was ready for examination of the judges.

Another advantage of this new German camera is that the pictures are taken by two stereoscopically arranged lenses of red and green glass respectively, which results in a more vivid and lifelike image than it has heretofore been possible to obtain.

By using this new device the judges will be able to decide the outcome of a contest with greater accuracy and with more justice to the competitors than the human eye is capable of.

**World's Rarest Stamp**  
The world's rarest and most valuable stamp, a British Guiana one-cent stamp owned by Mrs. Costa de Ury, N.Y., found no buyer recently when placed on auction at the opening price of £7,500 (about \$37,500). It is insured for £10,000.

The wrong side of every question isn't always the one supported by your opponents. They may sometimes be right.

## Why at 40 You Think You're "GROWING OLD"

It's Frequently Just an "Idea." Not "Old Age." And According to Something May Be Something No More Alarming Than A Touch Of Acid Stomach

At about 40, many people think they're "growing old." They're tired. They have headaches. Stomach upset. Dizziness. Nausea.

Well, scientists say the cause, in a great many cases, is merely an acid condition of the stomach. The thing to do is simply to neutralize the excess stomach acidity.

When you have one of these acid stomach upsets, all you do is take Phillips' Milk of Magnesia after meals and before going to bed.

Try this. You'll feel like another person. Try this. You'll feel like another person. Try this. You'll feel like another person. Try this. You'll feel like another person.

**Also in Tablet Form:**  
Phillips' Milk of Magnesia Tablets are now on sale at all drug stores everywhere. Each tiny tablet is wrapped in a special paper, a teaspoonful of water.

**PHILLIPS' Milk of Magnesia**

# New Rust Resistant Variety Of Wheat To Be Developed During 1936

New varieties of rust-resistant wheat produced by Canadian research institutions will not be released to farmers this coming year, but will be multiplied in 1936 "exclusively under the control of the originators," a press statement issued following a conference of representatives of the federal department of agriculture and the national research council at Winnipeg, Manitoba.

The new wheat from Manitoba, Thatcher, bred for rust resistance, was commended. This wheat has already been licensed for use in Canada.

The new rust-resistant wheat produced by the Rust Research Laboratory at Winnipeg has been named Remora. The selection from strains bred at Brandon experimental farm has not been named. The University of Saskatchewan selection is called Apex.

The general suitability of these varieties for eastern farm conditions, including such factors as yield, strength of straw, earliness, resistance to disease, as well as the milling and baking quality were critically examined. Several of these varieties were found, in the tests which were carried out, to be not only rust-resistant, but desirable from the standpoint of yield and quality.

In order to insure the most rapid propagation of this valuable material, it was decided that it will be increased in 1936 exclusively under the control of the originators. In order to speed up the multiplication of the material and to safeguard and to provide against loss through drought, arrangements are being made to have a considerable amount grown on irrigated land at the Dominion experimental station, Lethbridge, Alberta.

In view of the situation, the committee thought it desirable to make a statement with regard to the general characteristics of Thatcher wheat. The statement reveals that this wheat ripens two or three days earlier than Marquis and has very strong straw which is slightly shorter than that of Marquis. With regard to rust resistance, Thatcher is described by the Manitoba experimental station as moderately resistant.

In some seasons it shows as much as 40 to 50 per cent rust. Thatcher wheat is almost completely susceptible to leaf rust and covered smut, but is practically immune to loose smut. In this connection, it is of interest that the rust-resistant wheats produced in Canada are more constant in their resistance. So far, however, the rust infections on Thatcher wheat have not appreciably affected the yield. During tests conducted for three years it has given somewhat higher yields than Marquis. Under rust epidemic conditions it gives much higher yields than Marquis. In appearance, Thatcher is not equal to Marquis or Remora, the kernels being smaller and somewhat dull in color. Its weight per bushel, Thatcher averages slightly lower than Marquis.

In regard to the milling and baking quality, Thatcher gives a satisfactory yield of flour, which, however, tends to be slightly yellower than the flour obtained from Marquis. Its baking strength is satisfactory.

The meeting was held under the chairmanship of Dr. R. Newton, director of the division of biology of the national research council, Ottawa. Others present were: Dr. R. K. Neely and Dr. A. G. McCalla, University of Alberta; President W. C. Murray, Dr. W. P. Thompson, Dr. T. Thorvaldson, Dr. R. H. Larnard and Dr. J. B. Harrington, University of Saskatchewan; Dr. G. McCallister, University of Manitoba; Dr. C. E. Goulden, Dr. F. Peterson, J. Welsh, Dr. J. W. Craigie, Dominion rust research laboratory; Dr. W. P. Goddard, T. R. Atkinson, Dominion grain research laboratory; L. H. Newman, A. G. O. Whitehead, central experimental farm, Ottawa; Dr. J. G. Malloch, national research council, Ottawa.

Regardless of the energy expended in washing dishes clean, a film of grease one-millionth of an inch thick always remains on each dish.

## For Control Of Cancer

New Treatment Claims To Have Benefited A Number Of Cases  
Authors of the Coffey-Humber cancer treatment, which six years ago caused one of the greatest controversies in American medical history, told the American College of Surgeons they believed their system had benefited a larger number of patients than any other method.

The report gave for the first time the results of the first five years of this treatment, which they called a "research."

The authors, W. H. Coffey, M.D., and Dr. John D. Humber, of San Francisco, said they had treated only hopeless, inoperable cases, totalling 7,515. Of these they said 3,872 died before they could be given the minimum amount of treatment needed for more than relief from pain.

Of the others they said that a selected list of 1,040, chosen because there was no doubt these persons had hopeless, inoperable cancer and no known chance to live, showed to-day 108 known survivors and 50 believed to be alive but not counted because of incomplete records.

Of the 108 they said 53 are positively free of any signs of cancer. The others still have growths which, however, have become inactive.

## Waterbuckfull Of Fish

Welsh Town Has Many Oddities Including Its Own Name

Stories from north Wales, telling about the village of Llanfairpwllgwyddogochydwryndorwllandayllgo-goch are wrong. William Richard Smith, tailor, says so.

The name has been published as meaning "The village of the church of St. Mary by the pool of white hazels near the swift whirlpool of St. Tysilio's church of the Tidd Cave." Smart lived in the village and declares the correct name of the north Wales hamlet is Llanfairpwllgwyddogochydwryndorwllandayllgo-goch, which, is translated into English as "The village of the fair palace close to the white whirlpool in Saint's pool close to Dowlly's church near the fish trap."

The "fish trap" is a trough which fills with fish at high tide. Natives may go there and, for a fee of sixpence, scoop up a waterbuckfull of herrings.

The town's cemetery is on a body of land which Smart says becomes an island for a certain period every day when the tide is in, so funerals can be held only at low tide.

A "beating seven different kinds of apples, all of different flavor and exceptionally good, is another of the village's attractions.

## Electric Soil Heating

Used Extensively For Propagation Of Seed And Frostproof Plant Growth

Electric soil heating for the propagation of seed and promoting plant growth is making headway in Canada. Nearly 200 installations are now being used in the province of Ontario in greenhouses and in hotbeds and cold frames, for propagating the seeds of tomatoes, cabbage, cauliflower, egg plant, peppers, cucumbers, melons, certain flowers, rooting cuttings of flowers, evergreens, and sprouting sweet potatoes. The results of electric soil heating are stated to be very satisfactory. In the Burlington district the use of under-soil electric heating hastens the development of plants to set out in the field by about three weeks, and the growers report that freedom from worry when the weather changes is one of the distinct advantages of the system. Plants have much greater root development, stouter and thicker stems, and are generally more rugged. During the past season, plants which set out in the field had less wilt and made quick recovery from it.

As long ago as before 1850, the aquarium was officially adopted as an instrument in use in French nursery hands.

## Long Distance Phone Calls

Chimp Notes In Britain Bring Increased Revenue

Britain pioneered nearly a hundred years ago in introducing "penny postage" and to-day everyone takes it for granted that a letter may be sent half-way round the world for two or three cents.

This year Britain has led the way in cheapening long-distance telephone calls down to an almost nominal price. After seven o'clock in the evening a call from any point in Great Britain to any other costs only a shilling or 24 cents.

In a recent "Spectator" the experiment is described as a great success. Some trouble has been encountered through the crowding of telephone wires with messages, but that is being overcome. The multiplication of business is making the shilling rate pay, just as a huge increase in the volume of letters made the penny post pay.

The British example a century ago was followed by every other country though only after the lapse of a generation. It may be hoped less time will be needed to make the shilling long-distance telephone call universal.

—Winnipeg Free Press.

## Frank Cabbage

Five perfectly formed heads of cabbage grew on a single stalk in the garden of Sam Rowan of Stoughton, Wis. Each head measured about five inches in diameter.

One and a half acres of farm land per person is required for the production of enough food for an adequate diet.

Len: "Clark calls himself a human dynamo."

Dun: "Well, why shouldn't he? Everything he has on is charged."

## The SNAPSHOT GUILD CLOUDS AND FILTERS

If it's clouds you want in your next picture a filter will capture them.

Last week the Snapshot Guild received a letter from a reader who lives in the country. She wrote in part—"At this time of year the clouds are simply beautiful and often when their formations are unusually attractive I take many snapshots hoping they will register and give a rather true picture of the beautiful scene. I have been somewhat disappointed in the results. I have been unable to get a picture as true to nature as I had hoped for."

Clouds do add to the beauty of any outdoor picture but it is true that they do not always register through the lens of the camera as they appear to the eye.

Suppose we are taking a picture such as the one above and use a filter which is sensitive only to ultra-violet, violet and blue light. We should not be able to distinguish between the clouds and sky if we give enough exposure to allow detail in the landscape. This is because the light from the blue sky and the white clouds is very rich in light rays to which the film responds.

Although clouds and blue sky are both rich in ultra-violet, violet and blue, there is a marked difference between the two. The light from the clouds, being white, actually contains a certain amount of green and red light, while that from the blue sky does not.

This then makes it necessary to distinguish between clouds and sky in order to record both in a snapshot. We must, therefore, use a filter which will respond to green, or to green and red light, and also put over the lens a filter which holds back the ultra-violet and blue. The green and green and red light from the clouds will thus effect the film, while practically no light from the sky will get through to it, and in the finished print, the clouds will appear whiter than the sky.

Some film is slightly sensitive to green light but super-sensitive panchromatic film will respond to both green and red light. Such films will, therefore, show up the clouds against the sky if used with a positive filter. The deeper the yellow color in the filter the more violet and blue it removes or "holds back."

As you will no doubt surmise, there are various types of filters and each type has its limitations as in choosing a filter you must make your own decision, based on your general requirements. A good general all-round filter is the K-2 which requires lengthening the exposure two to four times, depending on the film employed.

There is also a filter known as a sky filter used extensively by the amateur to photograph clouds in landscape with no increase in exposure time. Half of this filter is yellow and the other half clear. This filter can be used without increasing the exposure because the sky is photographed through the lower half, which is not colored. If it's clouds you want a filter will prove invaluable.

## Bees And Tartaric

Unnecessary To Add Acid To Sugar Fed To Bees

Beeskeepers are continually being advised to add a small amount of tartaric acid to sugar syrup when feeding such syrup to bees as winter stores, states the progress report for 1930-31-32 of the Bee Division, Dominion Department of Agriculture. The claims made for the use of tartaric acid are that it prevents the re-granulation of the syrup and assists the bees to invert the sugar. At the Central Experimental Farm, Ottawa, a considerable amount of sugar has been fed to bees every winter without adding tartaric acid and without any apparent injurious effect on the bees. Further, from the results of the experiment carried out during the three years, it would appear to be unnecessary to add acid or any other agent to a solution of two parts sugar and one part water as winter food for bees. The main feature of the experiment was that in no case where a straight solution of sugar and water was given to the bees did the bees develop dysentery in the combs, and the inversion of sugar was as equally progressive as with the tartaric solution, showing that the bees required no assistance so far as the inversion of sugar was concerned.

Blizzards make life easier for the ptarmigan of the far north by keeping the feeding grounds swept free of snow.

## Canada's First Negro Military Unit Did Service In Victoria In Early Days

Talk of a colored "foreign legion" to aid Abyssinia recalls Canada's first "all black" organization, the Victoria Pioneer Rifle Corps, a live militia unit with a place in the sun 60 years ago, when the country around was called New California.

Settlement in California about 1850 of laws considered repressive resulted in the migration of 600 colored people from that state to the British settlements of New California, of which Vancouver Island was the principal inhabited section. The island then boasted a population of 7,000 whites and 2,000 Chinese and had been leased to the Hudson's Bay Co.

With the opinion the influx of the black race in the form of 600 industrious, law-abiding folk would benefit the colony, James Douglas, the governor, gave the new arrivals a cordial welcome and the assurance they would receive fair and impartial treatment. They settled around what was then Fort Victoria. Some of them later moved to Nanaimo and to Salt Spring Island, 20 miles away.

Finding the color line drawn when they tried to enter various "civil bodies" and when they appealed to Governor Douglas for permission to express their loyalty and citizenship in a militia company. Thus the Victoria Pioneer Rifle Corps came into being. It included a captain and two lieutenants, with 44 non-commissioned officers and privates, every man a full-blooded negro not long from California. They were instructed by a sergeant of marines from the H.M.B. Swiftsure.

The colored militiamen were armed with fintock muskets and wore uniforms of blue with white facings and pipe-clayed trousers, topped with the shako head-dress. Uniforms as well as equipment were issued by the Hudson's Bay Co. The men drilled faithfully and earned the reputation of an efficient military unit.

Meanwhile, most of the negro colony had embraced British citizenship, grateful in their freedom; as compared with the conditions of slavery then suffered by thousands of kinemen in the United States. But the color line was still drawn on Vancouver Island by some of the whites. It is recorded that on one occasion, denied admittance to the opera house, the colored people rushed the place and did some damage to the furnishings.

The negro militia corps paraded regularly until 1864, when, at the welcoming of a new governor, Arthur Kennedy, the authorities refused the unit permission to form part of the guard that day. They marched before Governor Kennedy, who diplomatically told them he regretted he had to decline official recognition to the corps. Vancouver Island had become a crown colony and administrative powers of the Hudson's Bay Co. had ceased. After some manoeuvres the corps paraded to the company's headquarters, turned in their arms and passed out of existence.

Interesting to note, the Dominion census of 1931 reported only 333 blacks in all British Columbia.

## Ancient Cab Still Useful

Decrypted English Text Tunes Fancy Of American Who Ships It To Boston

An ancient taxi caught the eye of a wealthy American, who took a fancy to a decrepit old taxicab during a visit to England. He had it transported across the Atlantic for use on his exclusive summer estate near Boston. The old taxi, which for the past 30 years has plied the streets of Liverpool, made an indelible impression on Mr. Donald Arger, of Chestnut Hill, and of Marine, Cape Cod, when he was last in England. He determined to have it for his own. Purchasing it for \$50, he had it shipped across the Atlantic at a cost greatly exceeding its value. The taxicab, owned by Mr. Donald Arger, of Chestnut Hill, and of Marine, Cape Cod, is now being used to convey guests from Mr. Angier's summer mansion at Marine to the yacht club, the country club or the beach, as the case may be.

WORLD HAPPENINGS  
BRIEFLY TOLD

Revision of the Treaty of Versailles means war, Winston Churchill, former chancellor of the exchequer, warned Britain.

Eleven members of the crew of the Soviet tanker Sovnarko were killed in an explosion while the tanker was loading petroleum at Krasnovodsk.

Discovery of a method for manufacturing a commercially adaptable gas from ordinary coal was claimed for two students of St. Paul by Dean R. U. Jones, head of the MacAlester College chemistry department.

Vast public granaries are to be established all over Hoped province in China, to insure the 35,000,000 people against famine. The province has been stricken, according to population, and the granaries must hold reserves based on population.

Political union of Nova Scotia, New Brunswick and Prince Edward Island, with Halifax as the capital of the maritime provinces, was advocated by J. Newton Harvey, Vancouver business man, in an address at Halifax.

Algoma wolves have started to pester lighthouse keepers on Lake Superior, states G. N. McDonald, keeper of the light on Parieson island. Wolves are plentiful on the island and are killing off chickens in large numbers, he said.

T. D. LeMay, Toronto planning commissioner, reported to the board of control that economic loss to Toronto through death and injury resulting from motor accidents last year was \$2,500,000. He recommended a traffic school be set up for all pupils more than 15 years old.

An ancient Ethiopian superstition—"Thou shalt sell no milk"—is preventing milk purchases from natives by the Italian army in Northern Ethiopia. The natives have a century-old belief if they sell milk their cows will die. Foreigners wanting milk, therefore, are buying the cows outright.

## Byng Of Vimy

Estate Bequeathed By Former Governor-General Of Canada

The late Viscount Byng of Vimy, governor-general of Canada from 1921 to 1926, left an estate with the gross value of \$155,000. It was learned in London.

He bequeathed his field-marshal's baton to his old regiment, the 10th Royal Hussars, which he joined in 1888 and commanded from 1902 to 1904.

To Lady Byng he left \$25,000 and the income for life from the residue of the estate, except for certain legacies to his servants.

After the Great War, Lord Byng was thanked by parliament for distinguished service and granted 150,000. He had commanded the Canadian corps in 1916-17 and the third army from 1917 to 1919.

## SUNDAY SCHOOL LESSON

NOVEMBER 17

## THE RETURN FROM CAPTIVITY

Golden text: The Lord hath done great things for us, whereof we are glad. Psalm 126:3.  
Lesson: Jeremiah 29:1-14; Ezra 1:1-11; Psalm 126:3-6.  
Devotional reading: Psalm 124.

## Explanations And Comments

The Proclamation of Cyrus, Ezra 1:1-4. Cyrus was a Persian by birth. He was at first king only over Babel, but one after another country fell before him—Media, Persia, Lydia, and then Babylon. In the first year that, as king of Persia, he captured Babylon and began his rule over the whole Babylonian Empire, the year 538 B.C., Cyrus made a great proclamation. That the word of Jehovah in the mouth of Jeremiah might thus be accomplished, we read, Jehovah stirred up the spirit of Cyrus so that he issued the proclamation permitting the exiled Jews to return to their own country. The prophecy of Jeremiah is found in Jer. 29:10. For this faith Jehovah, After seventy years are accomplished for Babylon, I will visit you, and perform my good word toward you, in causing you to return to this place. The word seventy is, of course, to be regarded as a round number.

By heralds and by written official documents Cyrus sent his proclamation throughout all his empire. It was his policy to claim the favor of the gods of every people, and he began his obligation to the Hebrews. "All the kingdoms of the earth hath Jehovah, the God of heaven, given unto me, and he hath charged me to build him a house in Jerusalem, which is in Judah," he declared, "knowing full well that ye the Jews to return was religious rather than patriotic, that the restoration of the temple was their main objective.

Cyrus did not order them to return, he merely permitted them to return, and counseled the Jews to return as well as the Jews who would remain to add the returning Jews by giving them silver and gold, goods and beasts, besides the freewill-offering for the temple.

Key over the Return to Jerusalem, Psalm 126:1-3. The first effect of the return was of dazed bewilderment, the Psalmist says; it seemed incredible, too good to be true, and but a dream. Polybius and Livy use similar language to describe the joy and astonishment of the Greeks when, after the conquest of Macedonia by Flaminia in B.C. 168, the freedom of Greece was proclaimed at the Isthmian games, A. F. Kirkpatrick recalls, "None could believe it." Livy, "that the had really heard aright; men looked at one another in astonishment as if it were the empty illusion of a dream; distrusting the testimony of his own ears, each began to question his neighbor."

Such is the stupefying effect which sudden joy or sudden sorrow often produces. When the moment of full realization came to the returning exiles, they broke out into songs and laughter, their joy was full. Said the nations round about, "Jehovah hath done great things for them," and the Psalmist says that the people realized that this was true, and joyously re-echoed the words as their own conviction: Jehovah had indeed done great things for them.

STOPS ITCHING  
In One Minute

For quick relief from the itching of pimples, blotches, eczema, rashes and other eruptions, apply Dr. Dennis' pure, cooling, liquid, antiseptic D. D. Prescription. Thirty years' world-wide success. Its gentle oils soothe the irritated and inflamed skin, thus aiding nature itself to heal the disorder. No fuss—no mess. Clear, greaseless and stainless—dries up almost immediately. Stops the most intense itching instantly. Try D. D. D. now. A 35c trial bottle, at drug stores, will prove it—or money back. D. D. D. Prescription is made by the owners of ITALIAN BALM.

## World's Super Timepiece

Impossible For This Clock To Lose Or Gain

A clock that will not lose or gain more than a fraction of a second in a year is to be installed at the Royal Observatory, London, Eng. It will be recognized as the world's super timepiece.

Controlled by electricity, its pendulum will swing in a partial vacuum at a constant temperature, and a series of electric impulses will be given out each time the pendulum swings.

The electric impulses will control the dials and mechanism.

The geographic centre of Montana is in the kitchen sink of a doctor in Lewistown, according to Montana state surveyors.

Garden lovers are reviving interest in "old" roses that were grown in gardens before the modern hybrids were developed.

## Debt Adjustment Act

Law Regulating Disposal Of 1885 Saskatchewan Crop

(Hon. T. C. Davis, Attorney-General)

(Continued From Last Week)

"Let me stress the fact that these exemptions apply only where a seizure is being made under writ of Execution issued under a Judgment obtained through the courts and do not apply in respect of other seizures in connection with which the absolute control of the situation is in the Debt Adjustment Board, which, of course, decides each case upon the merits of the case.

"Fourth: In connection with the repossession of farm implements, it is to be noted that a very material change was made in the Law of Saskatchewan in the year 1933 when it was provided that the right of a person, selling a farm implement, to recover the purchase price thereof was restricted to repossession of the article sold. This does not apply to implements where the value is less than \$100.00, or to lenders, but, in connection with every other implement sold, since that law came into effect, the farmer who purchases it cannot be forced to pay for the same, and the remedy of the seller of the machine is to return it to the person of the article sold. This naturally puts the seller of a machine, sold under this law, in a different position than one who sold under the law as it formerly was; under the old law, the seller had the promise of the purchaser to pay for the machine; under this law there is no enforcement of the promise. The seller is being limited to the return of the article he sold, naturally, is interested in seeing that the machine he sold is not depreciated through use without any payment for the use of it.

"The Debt Adjustment Act applies to contracts made prior to April 1st, 1933, and no repossession can be made of a machine purchased prior to that date without notice to the Board.

"Fifth: In conclusion, let me say, the government has been asked to state the general policy of the government in this connection. In this connection I would say, first of all, that before any person can make a seizure of the property of a person who makes the seizure must be taking any step at all, give thirty days notice, under the Debt Adjustment Act, of his intention to make a seizure. There are only two exceptions to this, viz., where the seizure is for taxes without notice and a seizure can be made in urban communities for rent, without notice, but in the case of seizures for rent, no sale can take place without the Debt Adjustment Board being consulted. Furthermore, in the case of municipalities, the Debt Adjustment Board has power to intervene. The government, as a matter of general policy, is highly desirous that business in Saskatchewan get back into ordinary business channels as rapidly as possible and that ordinary business relationship between individuals in the province be resumed as soon as possible without interference on the part of the government or of municipalities either by way of furnishing assistance, guaranteeing payments or otherwise, and as a first step towards this objective the government feels that the people of the province should, as rapidly as possible, get on a self-sustaining basis.

"During the last few years, owing to drought conditions and an absolute failure of production in a large section of the agricultural portion of the province, it has been absolutely impossible for the people therein to maintain themselves, and assistance had to be given to them by both the province and the municipalities which, in turn, were assisted by the government of Canada.

"In many sections of the province, for the first time in many years, the people therein are harvesting a crop this year, and after harvesting expenses are paid from the crop, it is highly desirable in the interests of all concerned that the farmer or producer provide for his seed and feed requirements and for his seeding operations in 1938 and also provide for the maintenance of himself and his family until next harvest, and

wherever in Saskatchewan crop conditions are such that the farmer is able to do this from the proceeds of his crop, then the government will assist him to do it, and seeks the co-operation of all classes, creditor and debtor alike, to secure this desirable end.

"Where the farmer has a surplus over and above his own requirements, for the purposes which I have mentioned, then the farmer should to the fullest possible extent improve his own credit by taking care of his obligations in order that by so doing he may at the earliest possible date re-establish his credit and thereby enable him to purchase his own necessities.

"At the meantime, the government will refrain from pressing for payment of debts due by individuals to it for direct relief this year in order to assist in re-establishing the credit of the individual, all towards the objective of getting business back into normal channels again.

"I am sure that municipalities, creditors and every person will be interested in attaining these ends, and I am sure will co-operate with the government to the fullest extent in trying to reach this condition.

"If any difficulty arises which may interfere with the producer protecting himself and his family to this extent, then the facilities of the Debt Adjustment Board are available to him to assist him in carrying out this intention.

"As I stated at the beginning, a representative of the Debt Adjustment Board is to be found at the judicial centre in each judicial district in the province and he is there to serve the people of this province and to do so free of charge."

The ancients made mayonnaise as early as 14 A.D. It was found mentioned in 487 recipes by a gourmet of that time.

The famous Gutenberg Bible is still preserved in 41 original copies. Every copy is valued at approximately \$100,000.

The Pilgrims were followers of the Puritan movement and, as such, abhorred dancing in all forms.

## This Knit Dress is Slim and Smart

PATTERN 5479

A trim little stand-up collar and a row of buttons marching down your chest show the important "military influence" in this smart one-piece knit dress. The V-shaped yoke and bloused sleeves are knit in a combination of ribbing and a lovely lacy stitch, while the rest, as you see, plain knitting and quickly done. This pattern may also serve for a blouse or three-quarter tunic.

In pattern 5479 you will find complete instructions for making the dress in sizes 16-18 and 38-40; illustrations of it and of all stitches used; material requirements.

To obtain this pattern send 20 cents in stamps or coin (cash preferred) to Household Arts Dept., Winnipeg Newspaper Union, 175 McDermott Ave. E., Winnipeg.

There is no Alice Brooks pattern book published

**Parasani**

## U. S. POLICY IN DEALING WITH FOREIGN WARS

Washington.—A policy of using "appropriate" influencing to stop foreign wars, while still keeping out of them, was enunciated recently by Secretary of State Hull.

In a broadcast address, intended to explain the United States' neutrality stand in the Italo-Ethiopian conflict, Mr. Hull at the same time made a plea for wider discretionary powers for the president in directing foreign affairs in times of international disturbance.

His suggestion was interpreted by some observers as paving the way for an administration request to the next congress for a more far-reaching but less rigid neutrality law than the present act. The existing law expires at the end of February. Congressional efforts already are under way to extend it.

Wide significance was attached here to Hull's words when he said: "Our foreign policy would indeed be a weak one if it began or ended with the announcement of a neutral position on the outbreak of a foreign war."

The secretary's address was read for him by William Phillips, under-secretary of state. "Hull himself was out of the city."

"I conceive it to be our duty and in the interest of our country and of humanity," his prepared copy said, "not only to remain aloof from disputes and conflicts with which we have no direct concern, but also to use our influence in any appropriate way to bring about the peaceful settlement of international differences."

With these words, Hull appeared in close accord with those who have held that the United States, if unable directly to co-operate with the League of Nations in its efforts to halt the East African war, at least should take all steps possible to insure its non-interference with the league actions.

He specifically recommended more discretion be given the president in determining the time for imposing an embargo. The present Neutrality Act, passed in the closing days of the last congress, automatically places an embargo on shipments of munitions and implements of war to the belligerents as soon as the president proclaims that a state of war exists.

Then, hinting some action might be sought in congress to strengthen the president's hand in stopping dealings with belligerents, he said: "Any discussion of the avoidance of war, or of the observance of neutrality in the event of war, would be wholly incomplete if too much stress were laid on the part played in the one or the other by the shipment, or the embargoing of the shipment, of arms, ammunition, and implements of war."

### Expresses Regret

Baron Tweedsmuir Writes To Farmer Whose Horses Were Killed

Ottawa.—Baron Tweedsmuir directed a secretary to write a letter of regret to a Pendleton, Ont., farmer whose two horses were killed by the vice-regal train as it sped towards Ottawa.

The farmer, Ovide Boudreau, narrowly escaped being struck by the train himself as he sought vainly to drive the horses from the track onto which they had strayed after escaping from their pasture.

The governor-general knew nothing of the incident until he read it in a newspaper. Pendleton is about 20 miles east of Ottawa.

### Frost Damages Fruit

Nelson, B.C.—Frost damage to apples in the Kootenay district will be higher than believed at first, fruit authorities announced. Early estimates placed the loss at about 10,000 boxes, but it was stated one orchard set alone lost 2,000 boxes, and another 1,000.

### Export Of Silver Forbidden

Tokyo.—Execution by a firing squad of all persons caught exporting silver has been ordered by General Sung Cho-Yuan, chief of police in the Peking and Tientsin areas of North China.

## May Reduce Forces

Some Warships In Mediterranean Likely To Be Withdrawn

London.—Progress toward a joint reduction of British and Italian forces in the Mediterranean was believed by informed sources to be under way.

British defence council ministers met at No. 10 Downing street after Sir Eric Drummond, British ambassador to Italy, conferred with Premier Mussolini at Rome.

Sources close to the government did not deny the ministers considered a reduction of the reinforced British fleet in the Mediterranean to help ease the Anglo-Italian tension.

In Paris it was stated the British are expected to take some of their warships out of the Mediterranean in exchange for further withdrawals of Italian troops from Libya, but that no announcement of this settlement is expected until after the British elections Nov. 14.

A stop to the anti-British campaign in Italy would be one condition of the settlement, it was said.

Said one usually trustworthy source: "It is a question of waiting until after the British elections."

An authoritative source indicated 11 Duce admitted disappointment that his earlier gesture in withdrawing one division of troops from Libya had not resulted in some reduction in the neighboring British fleet.

## Hepburn To Retire

Ontario Premier Is Suffering From Ill Health

Toronto.—Premier Hepburn announced that he would retire as premier of Ontario after the 1930 session of the legislature. His prospective retirement is brought about by ill-health.

"My two enemies, fatigue and worry, have pursued me relentlessly on this job and have resulted in complaints which culminated in my present condition," said Mr. Hepburn, who has been in power for little more than a year and who has only one session of the legislature behind him.

He didn't intend the announcement to be made just yet but it is a matter of public interest it might just as well be known now," added the premier. "I intend to retire from political life after the next session, solely because of poor health."

Mr. Hepburn is suffering from his fourth attack of bronchitis in four years and his inability to throw the disease off has caused himself and his physicians concern.

## Increased Business

Saskatchewan Pool Elevators Show Large Amount Of Grain Handled

Regina.—With deliveries through its country elevator system in 1934-35 amounting to 44.59 per cent. of total grain marketings through all country elevators of the province, Saskatchewan Pool Elevators Limited showed for the third year in succession a slight gain in its proportion of grain handlings. This information was submitted to delegates of the Saskatchewan Wheat Pool at their eleventh annual meeting here.

This figure of 44.59 per cent. compares with 43.2 per cent. of all country elevator deliveries in 1933-34. The co-operative organization owns approximately one-third of the country elevator capacity in Saskatchewan.

The volume of grains handled, however, was over five million bushels down from that of the previous season, a fact accounted for by an even smaller crop than in 1933.

### Soviet Buys Japanese Goods

Moscow.—Pravda, the official Communist party newspaper, announced the Soviet Union has placed orders in Japan for goods worth 62,000,000 yen, in conformity with the terms of the contract for the sale of the Chinese Eastern railway. Japan has already delivered goods to the value of 10,000,000 yen, the paper said. (The yen is currently quoted at 28.71 cents).

### Ship Turkeys To New Zealand

Edmonton.—For the second time in the past two years, a shipment of turkey breeding stock is being made by Alberta breeders to New Zealand. A second order is being developed for New York State.

## PRIME MINISTER

Hon. W. J. Patterson, who has just been elected Premier of Saskatchewan in succession to Hon. J. G. Gardiner, who has been appointed to the Dominion Cabinet.

## Heads Bank

John R. Lamb New President Of Bank Of Toronto

Toronto.—John R. Lamb, who started his career with the Bank of Toronto at the age of 18 and later became superintendent of western branches with headquarters at Winnipeg, has been elected president, succeeding the late W. G. Gooderham. It was announced here, Mr. Gooderham died several days ago.

Harvey B. Hume, general manager since 1925, became vice-president and general manager and Paul J. Myler of Hamilton, a director since 1916, was elected a vice-president. Mr. Myler is president of the Canadian Westinghouse Company Limited.

## Trans-Atlantic Service

Mollison In New York To Arrange For Planes

New York.—James Mollison, trans-Atlantic flyer, arrived here to buy three planes which he plans to use in starting a freight route between Ireland and Newfoundland next April.

The noted British airman said the planes would make semi-weekly trips across the Atlantic carrying news films, foreign fashion models and other freight. Mollison will fly one of the planes, his wife, the former Amy Johnson, one, and a pilot not yet named will fly the other.

## Pola Negri To Marry

London.—Pola Negri, film actress, declared here that she soon will marry "one of the most prominent men in England." She refused to reveal his name, but said she was a former member of parliament. She added that the wedding would take place Dec. 31. Miss Negri said she would not give up film work entirely. She expects to make one picture a year.

## Suggests Traffic School

Toronto.—T. D. LeMay, city planning commissioner, reported to the board of control that economic loss to Toronto through death and injury resulting from motor accidents last year was \$8,500,000. He recommended a traffic school be set up for all pupils more than 15 years old.

## NEW HIGH COMMISSIONER TO LONDON

Here are pictures of the Hon. Vincent Massey, left, who has just been made Canadian High Commissioner in London, and Mrs. Massey. Mr. Massey will succeed Hon. G. Howard Ferguson, who has represented Canada in England during the past five years.

## Famed Evangelist

Billy Sunday, Of Baseball Fame, Dies In Chicago

Chicago.—"Billy" Sunday, the internationally famous evangelist who caused thousands to "hit the sidewalk trail" to his pulpit and renounce the devil and rum, died suddenly of angina pectoris.

Sunday, who quit major league baseball at the height of his career to become the leading evangelist of the United States, had been an invalid for some time. He was visiting at the home of a brother-in-law here when he told his wife, "Mother, I feel d'ey." A doctor could bring the 72-year-old preacher only temporary relief.

The disease first seized him three years ago and had curtailed his preaching since.

He had been a compelling figure on North American revival rostrums since 1898—thundering voice, tangy phraseology, vehement in gesture.

Sunday, born in Ames, Iowa, November 19, 1863, finished high school in Nevada, Iowa, before continuing his education at Northwestern University in Evanston, Ill.

His first career was in professional baseball. He played with teams representing Chicago, Pittsburgh and Philadelphia in the National League between 1883 and 1890.

## Completes Model Flying Suit

Inventor Claims It Has Proved Efficient In Tests

Buff, Alta.—The dream of a lifetime, a "flying suit," making it possible for man to fly without the aid of present day aeroplanes with their heavy motors, is near realization for John Kropce, a 65-year-old inventor, according to claims he advanced.

Kropce, a native of Jugoslavia, who quit his job in a local hotel to devote his whole time to the perfection of the flying suit, announced he had completed a model, which in tests here had proved its efficiency. It has yet to be tried out by man. The inventor has completed an aluminum suit with metal wings and a series of springs, operated on the principle of the gramophone, called by its inventor the "metal man."

## Remember Canadian Corps

Trappist Monks Of Belgium Donate Wreath For Cenotaph

Ottawa.—For the first time since the war there was a renewal in Ottawa of the association between the ancient Trappist monastery of Mont des Cats, in Belgium, and the Canadian corps when on Remembrance Day a wreath was deposited on the cenotaph here by Maurice Olivier, of Ottawa, for, and on behalf of that institution.

Mont des Cats, a towering ridge which overlooked the plain of Flanders, was well known to Canadian soldiers, many of whom were treated in their latest stages of convalescence in the ancient monastery.

## Hardy Gophers

Calgary.—May be it is going to be a mild winter in southern Alberta. Country residents report gophers, which usually hibernate for the winter, still frisking about in deep snow, robbing chirping merrily in the trees and ducks swimming in open water on the rivers.

## ROYAL WEDDING OCCASIONS GREAT JOY IN LONDON

London.—London took the Duke of Gloucester's lovely Scottish bride to its heart, who, thousands offered Lady Alice Scott a tumultuous welcome on the drive to Buckingham palace from her home in Grosvenor place. Looking radiantly happy she smiled and waved repeatedly. Beside her was her brother, the Duke of Buccleuch, who gave her away.

Following the wedding ceremony the scene before the palace was reminiscent of war years. The king and queen, the duke and his bride, the princess royal and other royalties appeared on the balcony evoking a hurricane of enthusiasm. The big gates of the palace were fairly stormed, the crowds breaking police lines and even disturbing the guardsmen and sentinels within the quadrangle.

Another outbreak of cheering occurred when the bride and groom, escorted by household cavalry, drove to St. Pancras station on the honeymoon journey to Brighton. Home, Northamptonshire, a seat of the bride's family, Riga had fallen earlier, but the duke and duchess drove in an open carriage.

Members of the royal family, the bride's family and the bridesmaids shrouded the couple with rose petals as they drove slowly through the palace forecourt. Princess Elizabeth, both hands filled with rose petals, rushed to the side of the carriage and threw them over her uncle and new aunt.

The king and queen, the Prince of Wales and the dukes of York and Kent walked to the grand entrance to see the couple leave. The prince and the dukes threw rose petals, silver horseshoes, silver boots and silver true-love's knots into the carriage as it passed out of the palace gates.

The immense crowd cheered again and again and cried, "Good luck."

The 35-year-old duke and his 33-year-old bride had their first moment to themselves when they stepped into the flower-filled royal coach of the "Silver Jubilee" train which took them to Kettering. From there they continued by automobile to Brighton Hall.

Lady Alice, dressed in pearl, shades satin, and the 35-year-old duke, resplendent in the gold-faced blue tunic; scarlet breeches and black-topped boots of the Tenth Hussars, were pronounced man and wife by the Archbishop of Canterbury.

With the lighting of this torch, the Prince of Wales became the royal family's only bachelor.

This second royal wedding within a year—a ceremony stripped of pageantry because of the recent death of the bride's father, the Duke of Buccleuch—was in somewhat sombre contrast to the brilliant marriage last November of the Duke of Kent and Princess Marina.

## Cabinet Change

W. F. Kerr, Minister Of Natural Resources In Saskatchewan

Regina.—W. F. Kerr, Regina member of the legislature, was sworn in as minister of natural resources in the new Patterson government. He takes over the department administered by Premier Patterson. No other change in the cabinet is anticipated. Mr. Patterson said, though he admitted there might be some future changes in regard to administration of branches and bureaus.

## History Of Railway

Montreal.—History of the Canadian Pacific Railway in pictures is being told in Windsor station on the 50th anniversary of the completion of the first trans-continental line on Canadian soil. Some 300 pictures, embracing all the highlights of the company's history-making activities in Canada in the past half-century, have been secured from many sources.

## Seek Halifax Air Base

Halifax.—A trans-Atlantic air service between Canada and Europe with the North American base near here, is sought by a British Airways corporation.

## Duffield Doings.

A meeting of Duffield W.I. was held last week at the home of Mrs. Olaf Ohlsen, attended by 12 members. An interesting address on "Restriction of Immigration" was given by Mrs. A. Lord, Witterburn, the new Constituency convener, when she met for the first time with members of the W.I. at Duffield. Mrs. Lord outlined the qualifications for citizenship, as required in Canada today. Mrs. Mrs. Wood, convener of Stony Plain constituency, spoke on her new work as chairman of economics. Eleven girls have been enrolled for the sewing course to be held under the direction of Miss I. Alexander, of the Home Bureau. IS

Mr. and Mrs. James Collinridge entertained on Saturday for Mr. and Mrs. Horace Collinridge of Gunn. About 20 guests were present.

Some complaint is heard about the poor condition of the road south of town, particularly by truckers.

## Fischer-Rehkopf.

On Monday, Nov. 11th, at the residence of the bride's father, Inga, Miss Elsie Rehkopf was united in marriage to Mr. Carl Fischer, of Stony Plain. The ceremony was performed by Rev. H. Fry, pastor at Zion Lutheran church, Golden Spike.

### Stony Plain and District.

Messrs. L and H C Oatway Edmonton, were home over the week end and holiday.

Mr. Geo. Wolfe spent the week end at Three Hills, at a reunion of students of the Bible Institute there.

The latest news received from Mr. James Christie indicates that his outfit has arrived at Chilliwack, a town of 2000 population, situated in the Fraser Valley, 70 miles south and east of Vancouver, B. C.

Pupils at the local Public and High schools resumed their studies Tuesday morning, after a three-school day holiday.

A dance is billed for the Ukrainian Hall, Carvel, for tonight, the 14th.

The dance at Holborn hall, Friday Dec. 6 is for the purpose of providing funds for the school's Christmas tree.

Lutheran services in English will be held Sunday Eve. next, the 17th, in Stony Plain. Rev. H. Kuring, pastor.

New and second-hand text books for public and high schools on sale at The Sun Book Shop.

**BUTTER AND EGGS WANTED** at The Royal Cafe.

### In Memoriam.

In loving memory of Mary Schwanak, who was called away Nov. 14, 1932.

The dearest sister and sweetest friend;

One of the best whom God could lend.

She was loving; gentle, thoughtful and true;

Always willing a kind word to do.

It is not tears at the moment shed, That tell how beloved is the soul that has fled.

But tears thru many a long night wept

And loving remembrance fondly kept.

Ever remembered by her sister,  
—Florence.

### World Wheat Situation Improves

World's burdensome wheat surplus has practically disappeared. World's available supplies will come closer to world's requirements than in any year since 1928. Rumor in Canada and the U.S.A., drought in Argentina and Australia have brought about this situation, and so a rise in price. Fear of war also is tending to increase price. Other price-making factors are the amounts Russia and European countries will offer for sale. The purchasing power of the wheat importing countries as well will have an influence. In any case the situation from the viewpoint of the producer has greatly improved.

Sold by T. J. Hardwick, Stony Plain

## THE GOVERNMENTS SHOULD GET TOGETHER.

Reference was made in a recent issue to a report presented by the health organisation of the League of Nations to the effect that much of the world's population now estimated at a billion nine hundred million is chronically undernourished. Poverty and ignorance are to blame, the report says, but mainly poverty. Even in the face of world wheat surplus accumulations during the past few years which threatened economic stabilisation, pellagra and beri-beri continue to take thousands of lives every year. These diseases can be eliminated by the consumption of wheat, proven by the recent experiences of Newfoundland.

The report conceives one of the greatest needs of modern statesmanship is that governments seeking to dispose of food accumulations and governments needing such foods for the health of their own citizens, should find and find quickly some basis for agreement.

In all reasonableness it might be added, the producers of the surplus food should not be asked to sustain a loss on the production thereof.

# Find Out

From Your Doctor  
if the "Pain" Remedy  
You Take Is Safe.

Don't Entrust Your  
Own or Your Family's  
Well-Being to Unknown  
Preparations

BEFORE you take any preparation you don't know all about, for the relief of headache, the pains of rheumatism, neuritis or neuralgia, ask your doctor what he thinks about it—in comparison with "Aspirin."

We say this because, before the discovery of "Aspirin," most so-called "pain" remedies were advised against by physicians as being bad for the stomach; or, often, for the heart. And the discovery of "Aspirin" largely changed medical practice.

Countless thousands of people who have taken "Aspirin" year in and out without ill effect, have proved that the medical findings about its safety were correct.

Remember this: "Aspirin" is rated among the *fastest methods yet discovered* for the relief of headache, and all common pains... and safe for the average person to take regularly.

"Aspirin" Tablets are made in Canada. "Aspirin" is the registered trade-mark of the Bayer Company, Limited. Look for the name Bayer in the form of a cross on every tablet.

### SYNOPSIS

Nancy Nelson is a sub-deb, a gay, irresponsible girl of nineteen, with no care beyond the shade of her costume for her coming-out party. Suddenly, in the market crash, her indulgent father loses all he had, and his family is faced with the necessity of a simpler method of living. At this juncture a letter received from an eccentric relative in Colorado, who offers the girl a home on what seems to be impossible conditions.

After much consideration Cousin Columbine's offer is accepted, and Nancy and Jack arrive at Pine Ridge. Nancy set out one afternoon to climb to the top of the hill so as to obtain a view of the surrounding landscape and misses the path Aurora Tubbs had told her to follow. A truck comes along the road, driven by Matthew Adams, and she asks him what way to go. They ascend the hill, look around, and then go on to Cousin Columbine's. There Mark Adams tells Nancy that his brother Luke has broken his leg, and that Jack Nelson has been hired to help out while Luke's leg gets better. With Jack away, Nancy finds that she is lonesome, and having no books to read, the idea of starting a public library at Pine Ridge seems a good one, and Nancy writes home to get her parents to send all the books they could spare and all they could induce others to let them have.

Nancy's parents and friends give their liberal support to her request for books, and a steamer box arrived in due course. Father Adam painted a sign for the library, and the Adams boys worked on the shelves for the

books and decorations to make the room look presentable.

Jack Nelson, Matthew Adams, and Nancy go to the prairie home of Matthew Adams for the ride, and after Nancy and Jack leave for home, they are caught in a blizzard. Blinded by the swirling snow they collide with a stalled car of school children, which was stuck across the road with its back wheels resting in a snow-filled gully. Their car being wrecked, Jack and Nancy stay with the children and do all they can to help them. The next morning Jack sets out for help in the blizzard. He succeeds in finding help, and the party of children and Nancy are rescued. As a result of the exposure Nancy's feet are badly frozen and Jack is seriously ill with pneumonia, but both of them recover.

Now Go On With The Story

### CHAPTER XXIII.—Continued

"It's fortunate they're so much taller than the fence," said Jack. "I suppose they were intended to be amusing; but we can lower their feet without hurting the appearance of—" (he glanced about to be sure that Cousin Columbine was nowhere near), "of this magnificent property! Fall to, Sis, and get busy with that shovel."

The girl obeyed, rather enjoying the novelty of the task for a little while; but at last she paused, complaining: "I've struck a rock, Jack."

"In this place? More likely it's a bone some dog has buried."

Nancy laughed.

"It was an energetic dog then, or a prehistoric one! My post broke off lower down than yours, Jack, and I've gone a good bit deeper. Perhaps there's enough of a hole here now; but I want to see what this thing is."

"She lifted the spade, digging for a moment viciously. 'It certainly feels like a rock, but—'

Nancy ceased abruptly, and dropping flat onto the ground, reached into the new-made hole, where her brother watched, a smile of amusement lighting his eyes.

"For the land's sake what are you doing flat, or your stomach in all that dirt?" cried out Aurora, who had drawn near to superintend the work.

"Running for buried treasure," Jack answered, grinning. "Pieces of eight, you know. She thinks she's found—"

"You know," cried Nancy, scrambling up to the great excitement, "give me that crowbar, Jack. I have it!"

"What's all this commotion?" demanded Cousin Columbine, who, hearing Nancy's elated voice, had hurried out. "Mercy, child! have you been digging that hole with your two

hands? Nancy laughed, and answered: "It'll all come out in the wash, Cousin Columbine! You see, I've uncovered something down there—something that's evidently been buried for ages. I thought at first it was a rock; but it has sharp corners like a metal box. Did you people ever have any valuables that way in time of Indian raids?"

The old lady shook her head, and, pointing into the hole, replied: "You that I know of. Pry the thing out with your crowbar, Jack, but gently. It's your sister's property, you know."

"So it," affirmed Aurora. "Find it, Nancy's! but if it turns out to be a human skull don't let me see it! I never could abide the sight of bones, Jack Nelson. Even a good fresh soup bone goes against me."

No one paid any attention to this warning, for Jack cried out: "Great Scott! It is a box of some sort! Hold on there, Nancy, I'll—"

But his sister was already on the ground, reaching far down to where her discovery lay dislodged. In fact, one and all were on their knees beside her when she drew it forth: a small iron box, almost disintegrated by rust and time.

"Is it locked?" questioned Aurora, too utterly amazed to speak with her accustomed shrillness.

Nancy shook it cautiously, then with small difficulty raised the cover, disclosing what proved to be a Maltese cross of solid brass suspended from a crucifix carved from some dark stone. As she lifted the relic from its long hiding place, holding it aloft for all to see, a sense of awe held them silent for a moment; then the girl exclaimed in sudden inspiration: "Those Spanish priests! Could—could one of them have lost it, Cousin Columbine?"

The old lady reached out, touching the crucifix with reverent fingers.

"Why not? It may have lain here more than a century. Or perhaps it was captured by hostile Indians, buried for safety and then forgotten.

## THIS IS THE WAY TO HAPPINESS

There's nothing absolutely nothing—to take the place of perfect health as the foundation of a happy life. And no better way for every one to get it than to turn to that famous tonic wine, Wincopin.

Wincopin is not a drug. It is simply the purest of fine wines with all the valuable properties of the 23½ B. grapes which go to every bottle, combined with the strengthening elements of food and guaranteed vitamin malt extracts.

From your first glass of Wincopin you will feel new vigor stealing through your veins. You will sleep more peacefully, wake more refreshed, and in a few days you will have forgotten the irritability of your former half-starved state. You will go through the most strenuous day at the top of your form.

Twenty thousand doctors have recommended Wincopin for nervous debility, anemia, debility, and all nervous conditions. Start taking—and enjoying—Wincopin today. Your grocer sells Wincopin—Sainsbury's, Harold's, R. H. & Co. Ltd., Toronto.

IF you find an inscription, even a date, which it will shed some light on this strange mystery. Carry box and all into the house and we'll examine them.

In this absorbing interest the gate posts were forgotten for an hour; but no clue as to the origin of the buried relic was discovered; and though Jack dug deeper in the hope that other treasures were buried nearby, his efforts were fruitless.

"What stone is the crucifix carved in?" questioned Nancy, when the gate posts properly erect at last, the subject was resumed at the dinner table.

"Chalcedony, I think," said Cousin Columbine. "And did you notice the hammer marks and filed edges on the Maltese cross?"

"Yes, very ancient, if not any older. These things are of real historical value," Nancy. They should be in some museum; but surely you have the right to keep them for the present. In my own mind, however, I doubt that they came from one of the Spanish expeditions. Dear me! what a story we shall have to tell the Adams! Did Mark say what time they would send down for us?"

"Not before five. I have some things to do at the library this afternoon; and it took 'thin' packing so that to-morrow will be free. It gives me a terrible feeling," Cousin Columbine, to think how soon we're going to leave you!"

"I'll be glad to see you," said Nancy. "A worse one," declared Aurora as she thumped her apple pie down on the table. "Pine Ridge won't never

be the same again, if you ask me; not that it won't be nicer before you came, with the Aladdin Library on everything. You've had an awful good influence on us, Janita, Nancy Nelson, even if you have got her so she wants her dresses darker. I like on a young girl, or an old one either for that matter. But she's took your advice about going to business college some 'rail, and I stay with her Aunt Emma down to Colorado City while she learns shorthand. I hope she don't marry some good-for-nothing feller afterward. No use wasting money on an education if you're to spend your life over a wash tub."

That afternoon when all the last-minute packing was accomplished, Nancy slipped into the white sport silk she was to wear at the Adams', and sought the library. It was not "Library Day," but she wanted to finish numbering a second box of books from the Oklahoma family, as well as to write instructions for Mary Taylor; and not wishing to be interrupted, she closed the door. Nancy worked slowly, pausing every now and then to look about with that pleasurable sense of accomplishment the little library always gave her, wondering why, when these minutes in Pine Ridge had gone so well and she was eager to see the family, this horrid homesickness kept creeping over her.

"It must be because Edgemere's so far away," she mused, and Cousin Columbine had to have us go. And there are the Adams! It would be queer. . . . Nancy closed her eyes as if to call up some picture, and her color rose as she said impatiently: "Why don't you face the truth, Nancy! You just can't bear to leave because."

The door pushed open.

"Do you mind if I interrupt you for a moment?"

(To Be Continued.)

## A NEW SERIAL STORY

Arrangements have been completed for presenting "Our Readers a new serial entitled 'The Westerner's Story,' written by Lawrence A. Keating. This is an absorbing and exciting story of the western plains, and those who follow the installments as they appear each week, will be thrilled by the inevitable situation. This story will be commenced in an early issue. Be sure that you do not miss the opening chapters.

## WATCH FOR IT

### Paralysis Is Contagious

Recovery From The Disease Is Required To Produce Immunity

Sixty per cent of Edmonton residents are immune to infantile paralysis, according to the best medical opinion on a dread disease, knowledge of which is still in the transitional state, it is declared by Dr. R. B. Jenkins, medical health officer.

While some have said that infantile paralysis is not contagious, Dr. Jenkins said, the findings of all recognized authorities make this assertion "absolutely true." It has been proven by authorities, he said, that the disease can be spread in food and drink and by human carriers and insects.

In laboratory experiments the disease was spread from monkey to monkey by a stable fly. The virus remained active on house flies for 48 hours.

Knowledge of infantile paralysis is rapidly improving and years ago there were undoubtedly many mild cases not recognized. Even today parents said to be carriers might actually be mild cases. Recovery from the disease is believed to produce immunity. No recurring cases are known.

### Cigarettes in Canada

Every time a cigarette is carelessly tossed aside there is a danger of fire. A mathematician will tell you that if all the cigarettes smoked in Canada last year were placed tightly end to end they would encircle the earth at the equator nearly eight times. This is purely academic interest but the fire hazard of 197,000 miles of cigarettes is of very real interest to Mr. and Mrs. Canadian Citizen because it hits where it hurts—right in the pocket.

## Little Helps For This Week

I will sing unto the Lord for He has dealt bountifully with me. Psalm 134.

Thy calmness bends serene above, My restlessness to still. Around me flows Thy quickening life.

To serve my faltering will Thy presence fills my solitude; Thy providence turns all to good.

With a heart devoted to God and full of God, no longer seek Him in the heavens above or the earth beneath, or in the things under the earth, but recognize Him as the great fact of the universe separate from no place or part, but revealing Himself in all things and events moment by moment. And as eternity alone will exhaust this revelation which has sometimes been called the Eternal Now, then shalt thou find God ever present and ever new, and thy soul shall adore Him, and feed upon Him in the things and events which each new moment brings, and thou shalt never be absent from Him, and He shall never be absent from thee.

### Tear Gas

Is Recommended For Defence Instead Of Bullets

J. Edgar Hoover, director of the United States bureau of investigation, recommends tear gas instead of bullets for self-defence. "A drop of tear gas will incapacitate the criminal," he said. "Firearms require a certain amount of technical skill in operation, whereas gas guns can be used effectively with a little practice."

A maid who recently joined the church was asked how she knew she was converted. She replied, "Because I clean under the rugs."

It has been estimated that 10 cosmic rays, with energies up to 10,000,000,000 volts pass through the human body every minute.

Deauville, France, has organized a bicycle police squad.

## MEN HUNGER FOR SECURITY.

Over the generations, much has been made of the social discontent that is created by striking contrasts of income.

Beginning with the parable of Dives and Lazarus down to the cartoons of the radical press in revolutionary Europe, we have been treated to vivid representations of extreme poverty existing side by side with extreme wealth.

These vivid contrasts between riches and poverty, between the plutocrat and the proletarian, between the robed and the ragged, have given rise, in turn, to two moods upon the part of the less fortunate.

The mood of resignation.

The mood of revolt.

It may be that these vivid contrasts will always exist and will, to the end of time, produce these two moods.

But I suggest we are now in a period in the economic evolution of the modern world when the thing which is likely to produce the greatest social discontent is not the vivid contrast of economic income but the vivid contrasts of economic security.

It may not be the highest compliment to man, but the fact would seem to be that men hunger for security even more than they hunger for freedom.

Freedom is a challenging thing.

Security is a comforting thing.

When man has complete security he hungers for risks, and if his normal life does not provide risks he will look for them in jungle hunting or in North Pole exploration.

But when man has haunting insecurity his greatest hunger is for security, and this hunger will color and control his political and social reactions at every turn.

This is why the biggest problem today confronting political and economic leadership is the finding of ways and means to establish economic security for the millions.

The system of free capitalism and political liberty need not have any fear of Communism making any inroads on life if this system can but bring to the working millions a decent security.—Written by Glenn Frank, president University of Wisconsin, in 1931.

## W! the Braw Laddies.

The annual meeting of the Stony Plain Curling Club was held in the town hall Friday, Nov. 8th.

The following officers were elected for the ensuing season: Pres., J. W. McCulla; Vice-Pres., W. J. Connolly; Sec.-treas., Dr. Outway; Executive Committee: Geo. Oppertshauer, F. W. Yeats, Wm. Robertson; Ladies' Committee: Mrs. Walton, Mrs. G. Oppertshauer, Mrs. Henry Oppertshauer, Mrs. Lewis.

Fees were set at \$7 for men and \$2.50 for ladies.

Work on the rink will be commenced this week.

## [Charges Were Dismissed.

Last week Mr. Bryan appeared as defence counsel for Messrs. Criss and Guch of Tomahawk, on charges of theft. The cases were heard at Seba, by Justices Bell and Terry, and in both cases the charges were dismissed. R. D. White of Edmonton appeared for the prosecution.

## The 1936 Auto Plate's Color.

It is announced that Alberta's auto license plates for 1936 will have orange figures on black. Of all 1936 color combinations so far chosen, only those of the states of New York and New Jersey coincide with those of this province. Saskatchewan, Kansas, California, Idaho have "reversed" Alberta's choice, and will have black letters on an orange background.

## A Good Time Coming.

Reorganisation of operations of the Debt Adjustment Board was indicated as likely by Premier Aberhart, in a recent interview in Calgary.

"The Debt Adjustment Act is not working out as satisfactorily as we feel it might. The farmers need protection in some cases, but in other cases the creditors need it. Whatever change is made will be done very gradually. It is essential that the credit of our country be kept at par. We feel satisfied that when we are prepared to introduce Social Credit, this difficulty will largely disappear," said the premier.

## Health Education in Schools.

An extensive program of health education in Alberta schools as a means of guarding the future health of the province will be carried out, Minister of Health Cross announced at a joint gathering of teachers attending a convention in Edmonton last week. "A great deal more emphasis is going to be placed on teaching health in the schools than has been done in the past," Mr. Cross declared.

## Plan To Test Gasoline Tax.

Motorists in all parts of Alberta will watch with special interest the results of the legal action initiated at Edmonton by C. H. Grant, K.C., to challenge the validity of the gasoline tax in this province.

Definite notice of intention to test the Act has been given, and it is expected that proceedings will commence soon. Mr. Grant is acting on the behalf of a private client.

When the Provincial Government raised the tax from 6c to 7c per gallon last April there were threats that validity of the legislation might be challenged, but no definite action was taken. Nevertheless there was a feeling that within the year the Government might reach the courts.

A vigorous fight against a practice of raising the tax without specifically earmarking the revenue for road construction and maintenance purposes has been waged for years by Alberta Motor association.

Expecting to take around three million dollars a year out of the motor driving public in this way, the Government would naturally be in a serious predicament if it were proved the gasoline tax was illegal.

## Two-on-a-Raft.

"How will you have your eggs cooked?" asked the waiter.

"Make any difference in the price of 'em?" inquired the cautious customer w/ brimless hat and ragged beard.

"No."

"Then cook them on the top of a slice of ham," said the customer, greatly relieved.

## The Sun's Calendar.

## On the Side.

During last August General Motors of Canada had questionnaires distributed thruout Canada, asking hockey fans their opinion on the G. M. broadcasts during the hockey seasons of the past few years, and inquiring if the fans wished the hockey broadcasts continued. The answers received were satisfactory, as the first nationwide broadcast of this season was given Saturday evening last from Toronto, where the Maple Leafs encountered the These broadcasts will be heard every Saturday at 7 p. m. M.S.T., thru the courtesy of Chevrolet, Oldsmobile and other General Motors car dealers.

—Aren't some farmers unfortunate? Here's Oscar Ansteth, a 68 yr old Saskatchewan farmer who at one time owned and operated 1800 acres, retired last July to a small shack to live. The other day he used gasoline on the fire and the shack burned. Worth \$15,000 6 years ago, drought and crop failure reduced him to the extent where he has now only \$10 fire insurance due on the loss of his shack.

—Some have funny notions about a diet. A youth named Maurice Works was taken to a Calgary hospital, after collapsing on the street. He confided to attendants he had been eating razor blades, small nuts and bolts, tacks, gramophone needles and bits of glass during the last four years.

—Word received from "dear Old London" state that bicycles in the United Kingdom outnumber motor vehicles by ten to one, the cycling craze being far in excess of that of the 60's.

—Harold is in the spotlight again. Charged with having attempted to kill himself by unlawful fasting, Harold F. Davidson, ex-clergyman, was remanded on bail at Blackpool, Eng. Harold had stated he would starve to death unless the Bishop reinstated him.

—Sparkie says, if you have to reduce your standards to be a "good fellow," you're with the wrong crowd.
